**CONCRETE RELEASE OIL**

**All-Season Usage for Construction**

**Outstanding Clean Release Properties**

**DESCRIPTION**

Gard™ Concrete Form Release Oils are blended from special non-staining base oils and clean releasing additives to provide outstanding service in highway, bridge, and pre-cast concrete manufacturing applications. These oils may be used on metal or wooden forms and may be applied by brushing, rolling, or spraying. GardForm allows concrete to separate quickly, easily, and minimizes need to clean forms after casting.

Gard Concrete Form Release Oils is a bond-breaking coating of composition that will not discolor or injuriously affect the concrete and is available in two viscosity grades: 2006 (the normal grade) and 1300 (a heavier grade). Both grades have been tested by the State of Louisiana Department of Transportation Development and are approved for use on state highway and bridge construction projects. Both products are listed on the Louisiana qualified products list #29 as approved portland cement release oils.

**BENEFITS**

- Clean and easy release of cast concrete from metal or wooden forms
- Outstanding rust prevention on metal forms
- Non-staining
- Two viscosity grades per application requirements
- Works with all approved paints on Louisiana DOTD QPL list #14

**APPLICATION**

- Highway, overpass, and bridge construction projects
- Foundation and retaining wall construction for homes and commercial buildings
- Pre-cast concrete products such as culvert drain pipes, box culverts, burial vaults, and concrete artwork
- Easy application by spray, roller, or brush

**PERFORMANCE RATING**

| State of Louisiana QPL 29 | State of Texas TxDOT Specification S-420 |
