

CK-4

PRODUCT LINEUP

Beginning Dec. 1, 2016, the new API Diesel Engine Oil standards CK-4 will go into effect for use in high-speed four-stroke cycle diesel engines. This new standard is designed to meet 2017 model year on-highway and Tier 4 non-road exhaust emission standards as well as for previous model year diesel engines. Martin Lubricants is ready for the change with heavy-duty engine oil offerings in our full synthetic line SynGard and in our agriculture line Xtreme. See below for viscosities, and sizes that will be effective Dec. 1, 2016.
