

OIL ANALYSIS

Oil Condition Monitoring and System Check

**NEW
PROGRAM**

CrossCheck® Oil Analysis Is A Complete Service Program That Delivers A Detailed Analysis Of Oils In Use. **CrossCheck® Oil Analysis** Provides Lubricant Users With The Ability To Monitor Their Equipment's Operating Performance.

**CrossCheck® Standard
Oil Analysis**

**CrossCheck® Industrial
Oil Analysis**

**On-Line Equipment
Management**

OIL ANALYSIS

CrossCheck® Oil A detailed analysis of engine, transmission, gear and hydraulic oils enables you to identify potential problems before a major repair is necessary.

CrossCheck® Standard Oil Analysis reports will provide you with the results of tests performed, evaluation, recommendation, and a cumulative history of previous tests to identify contaminants. Any tests that are outside normal limits will have a shaded box over the result.

CrossCheck® Industrial Oil Analysis is an effective, in-expensive tool which provides information about the internal condition of the major components in vehicles and equipment. Analysis reports will provide you with the results of tests performed, evaluation, recommendation, and a cumulative history of previous tests to identify contaminants. Any tests that are outside normal limits will have a shaded box over the result.

APPLICATIONS	ENGINES	NON-ENGINES
Purpose	Monitors wear & contamination	
23 Metals by ICP	•	•
Viscosity @ 100°C	•	• (@ 40°C if ISO grade fluid)
Anti-Freeze	•	•
Fuel Dilution	•	•
Water % by Crackle	•	•
% Soot	•	•
Oxidation/Nitration By FTIR	•	•

APPLICATIONS	ENGINES	NON-ENGINES
Purpose	Monitors wear & contamination	
23 Metals by ICP	•	•
Viscosity @ 100°C	•	• (@ 40°C if ISO grade fluid)
Particle Count	•	•
Karl Fischer Water (PPM)	•	•
Antifreeze	•	•
Oxidation/Nitration By FTIR	•	•
Total Acid Number	•	•

CrossCheck® Standard Oil Analysis

\$8.50 per sample

\$85.00 per case of 10

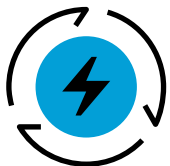

#590848

CrossCheck® Industrial Oil Analysis

\$21.50 per sample

\$215.00 per case of 10

#590856

On-Line Equipment Management - at a glance One Click to see all critical units & how many days since last sample. Create Bar -Coded Labels. Maintain complete history of unit. View, print, save reports. Multiple Trend Reports available i.e., Jobsites, Equipment by Last Activity Date, Fleet Trend by Make & Model, Interpretation & Comments, Monthly Sample Activity, and more...
